

# Let's get started

## 1 Attach the base.

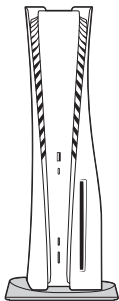

Always attach the base to the console, whether it's in the vertical or horizontal position.  
Place your console on a flat surface when attaching the base.

You'll need to reconfigure the base for the position of your console. Rotate the top and bottom part of the base in opposite directions. Keep rotating until you hear a "click".

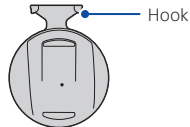

### For the vertical position

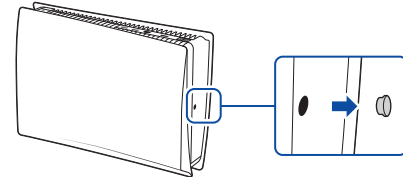

With the base attached

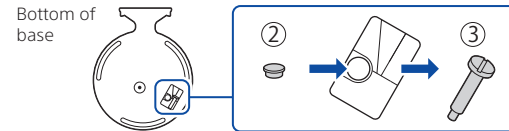

Make sure the hook is in the position as illustrated below before attaching the base to the console.

- ① Place the console with the rear side facing up, and then remove the screw hole cap.

- ② Attach the screw hole cap to the bottom of the base.
- ③ Remove the screw from the bottom of the base.

- ④ Attach the base, and then secure with a screw. Use a coin or similarly shaped object to tighten the screw.
